BASE MONSTERS

ベースモンスター

Key Information

• Contract Address: 0x7982333172611671D1fd08172BdBbBcDf61B184b

• Total Supply: 1,000,000,000 BMON

• Buy Tax: 0%

• Sell Tax: 0%

1. Introduction

Launched in September 2024 on Base Chain, Base Monsters (BMON) is a community-driven project that fuses decentralised finance (DeFi), non-fungible tokens (NFTs), and immersive gameplay. Initially focused on monster-themed NFT trading cards, the project has since evolved into a robust ecosystem featuring:

• An upcoming deck-builder trading card game (TCG) developed in partnership with DeHub (DHB).

• A dice-roll-based RPG adventure offering story-driven exploration and NFT-based rewards.

By integrating NFT technology with sustainable tokenomics and interactive gaming experiences, Base Monsters aims to maintain community engagement, encourage long-term holding, and provide genuine utility for collectors, gamers, and investors alike.

2. Project Overview and Evolution

2.1 Early Foundations

• Monster-Themed NFTs: The project began with collectible NFTs styled as trading cards, providing both visual appeal and a funding source for marketing and development without relying solely on token sales.

• Zero Tax Structure: To lower barriers to entry and foster a vibrant community, BMON maintains a 0% buy and 0% sell tax.

2.2 Growth Milestones

• Expanded Gaming Ecosystem: Development now includes both a deck-builder TCG (in partnership with DeHub) and a text-based RPG adventure, broadening the scope beyond simple NFT collectibles.

• Enhanced Transparency: Wallet addresses, tokens, and partnerships are shared openly, allowing community members to verify holdings and locks in real time.

• Partnerships and Collaborations: Alliances such as the one with DeHub (DHB) bring gaming and blockchain expertise to Base Monsters, ensuring professional development and smooth Web3 integration.

3. Token and Wallet Transparency

Contract Address: 0x7982333172611671D1fd08172BdBbBcDf61B184b

3.1 Overview and Disclaimer on Wallet Data

Base Monsters (BMON) is committed to openness and accountability in how tokens are distributed and used. However, certain balances—such as locked tokens (via UNCX) and marketing allocations—may change over time as they are utilised, re-locked, or assigned to new partnerships.

Below is a general outline of how tokens are allocated (actual balances may vary):

• Project and Marketing Wallets: Funds for promotions, community events, and operational costs.

• Individual and Partner Wallets: Allocations for team members and partners, some of which may be secured in UNCX for long-term trust.

• UNCX Lockers: Locked tokens to ensure stability. Not all locked tokens belong to Base Monsters; some are controlled by partners like DeHub.

3.2 Verifying Live Wallet Data

For the most current information on token balances and lock statuses:

1. On-Chain Monitoring: Use Base Chain explorers or the UNCX dashboard.

2. Telegram Community: Join https://t.me/BaseMonstersPublic and type "wallet" to see live wallet data, helping all participants stay informed in real time.

4. Partnerships and Collaborations

4.1 DeHub (DHB)

A key partnership for Base Monsters is with DeHub (DHB), a Web3 gaming and interactive entertainment platform backed by a skilled development team. Through this alliance:

•	Expert Game Development: DeHub is spearheading the TCG's development, ensuring polished mechanics and engaging gameplay.

•	Seamless Web3 Integration: Their proven track record guarantees smooth blockchain connectivity and immersive user experiences.

•	Shared Vision: Both teams aspire to push the boundaries of blockchain gaming, focusing on player-centric design and long-term ecosystem growth.

5. Game Ecosystem Overview

Base Monsters offers two core gaming experiences—a deck-builder TCG emphasising strategic depth and an RPG text adventure centred on dice-roll mechanics and storytelling—with more innovations on the horizon.

5.1 Deck-Builder TCG

Core Elements and Card Types

- • BMON Cards (Leader Cards): Each deck includes a primary BMON with evolving abilities. Only one BMON can be active on the battlefield at a time.

- • Unit Cards: Support creatures with Attack, Defence, and unique Abilities.

- • Spell Cards: One-time effects for healing, damage, buffs, or debuffs.

- • Object Cards: Persistent effects that remain on the field.

- • Terrain Cards: Modify the battlefield environment, offering buffs or debuffs based on elemental synergy.

Type Effectiveness System

- • 18 elemental types (e.g., Grass, Fire, Water, Normal).

- • Each type has one advantage (+1 Attack) and one disadvantage (-1 Defence) against another type.

- • Balances deck-building and adds strategic variety.

Game Phases

1. Draw Phase: Players draw a card.

2. Play Phase: Spend energy to deploy BMON, Units, Spells, or Objects. Energy increases each turn.

3. Combat Phase: Attackers and defenders assign units; the outcome is decided by stats and type advantages.

4. End Phase: Reset leftover energy, finalise turn-based effects.

Trainer System

•	Secondary characters offering extra abilities or buffs.

•	Gain XP over matches, unlocking new BMON types and specialised skills.

Blockchain Integration

•	Base Chain Wallets: Players connect to mint, trade, play and wager $BMON or NFTs.

•	NFT Marketplace: Buy, sell, or trade Base Monster NFT trading cards.

•	Dynamic Overlays: Card stats update in real time over the NFT art, keeping the collectible's appearance intact.

5.2 RPG Text Adventure

Introduction

One of the standout features of Base Monsters is the text-based RPG adventure available at basemonsters.xyz. This narrative-driven mode immerses players in a new dimension of the Base Monsters universe, featuring exploration, branching storylines, and unique gameplay twists.

Adventure-Specific Mechanics

Each new storyline may introduce new playstyles or mechanics that add variety and replayability. Choose your companion in a dungeon or interrogate suspects in an investigation. Every adventure offers fresh experiences while maintaining the core ethos of Base Monsters.

Dice Rolls & Choices Matter

Progress is governed by dice rolls, branching paths, and pivotal decisions. Whether you are battling foes, solving puzzles, or forming alliances, your actions have a tangible impact on the outcome. This design ensures that no two playthroughs unfold in exactly the same way.

Exploration and Collectibles

As you journey deeper into the narrative, you will gather resources, uncover lore, and expand your "Basedex" with entries on various BMON creatures. While each chapter presents surprises and hidden details, we avoid spoiling future expansions to maintain a sense of discovery for players.

NFT Rewards and Minting

Early participants can mint an exclusive adventure pass to unlock unique NFT rewards. Once the mint supply is depleted, the RPG becomes free-to-play, preserving the value of these special collectibles. This text adventure represents the first of many story-driven experiences planned for the Base Monsters universe, complementing the strategic nature of the TCG with rich narrative content.

Summary

By offering both strategic and narrative-driven modes, Base Monsters delivers a multifaceted ecosystem where players can immerse themselves in thrilling gameplay, storytelling, and collectible NFTs. The RPG adventure showcases the project's commitment to continuous innovation and diverse content, ensuring that every type of player—whether story enthusiast or competitive strategist—finds a home in the Base Monsters community.

5.3 Agent Pollak 0x7

Overview

Agent Pollak 0x7 is an interactive AI, engineered as a guide and companion within the Base Monsters (BMON) universe. Users can interact with this persona by simply addressing it as "Agent," "Pollak," or "0x7" within the community, offering a dynamic way to explore lore, solve mysteries, and uncover hidden secrets.
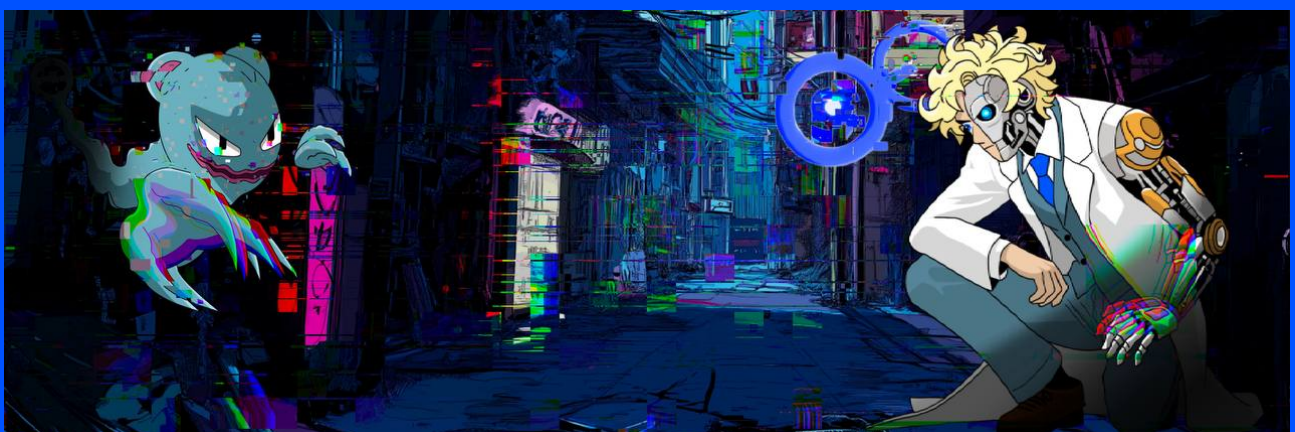

Initially exclusive to our Telegram group, Agent Pollak 0x7 responds autonomously to queries, shares insights into the lore, and engages in community-driven events. This AI character enhances the Base Monsters ecosystem, providing members with an engaging and interactive resource.

Future Expansions

As Base Monsters continues to grow, Agent Pollak 0x7's capabilities will expand to include:

• NPC Integration in the TCG: Pollak will appear as a non-playable character in the deck-builder game, offering hints and side quests.

• Autonomous Social Posting: Beyond Telegram, Pollak will extend its reach to other social media platforms, fostering broader engagement.

• In-Game Activities: Pollak will assist with lore-driven events and tournaments, further enriching the gameplay experience.

By integrating AI technology into the Base Monsters ecosystem, we aim to create a living narrative that keeps players and community members entertained and continuously discovering new facets of the BMON universe.

6. $BMON Utility and Ecosystem

6.1 Play-to-Earn Incentives

Upcoming expansions will enable Play-to-Earn (P2E) mechanics, rewarding players with BMON for successful battles, quest completions, and broader community involvement.

6.2 In-Game Purchases

Players can use BMON or Base ETH to buy:

- Cosmetic Items: Skins, card backs, animations, and more.

- Card Packs or Expansions: If introduced, these packs will contain new Units, Spells, or BMON leaders.
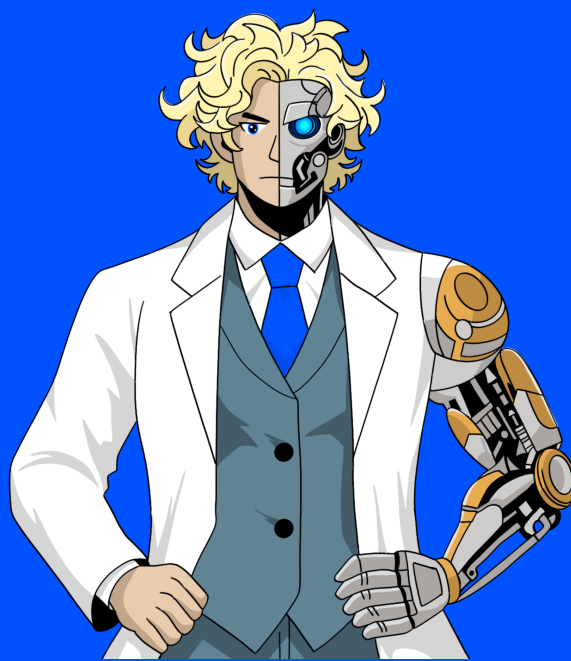

6.3 Trading and Marketplace

An auction and trading platform will facilitate:

- Buying and selling monster-themed NFTs.

- Wagering BMON tokens or NFT cards in competitive matches or tournaments.

6.4 Community Engagement

Regular events—such as tournaments, art contests, and influencer collaborations—will keep the ecosystem lively and promote active participation. As BMON evolves, the goal remains to foster a passionate community central to the project's long-term success.

7. Tokenomics and Sustainability

7.1 Total Supply

- 1,000,000,000 BMON

- Buy/Sell Tax: 0%

This zero-tax model encourages user adoption and trading activity, removing common barriers seen in high-tax token ecosystems.

7.2 Allocation Approach

- Project & Marketing: Supports campaigns, listings, and development.

- Partner Allocations: Certain tokens may be locked or vested for collaborators like DeHub.

- UNCX Lockers: Used for security and stability. Not all locked tokens belong to Base Monsters; some are owned by partners.

7.3 Sustainability Model

Base Monsters focuses on NFT sales, in-game purchases, and other ecosystem-driven revenues rather than relying solely on token sales. This creates a more stable environment for BMON, tying the token's success to the overall growth and engagement of the platform.

8. Roadmap and Next Steps

1.   RPG Adventure Updates

•   Expand the text-based adventure with new areas, items, and quests.

•   Provide limited-edition NFT mints tied to storyline milestones.

2.   TCG Development with DeHub (DHB)

•   Refine gameplay mechanics, card balance, and type interactions.

•   Incorporate advanced blockchain features such as NFT wagering and dynamic overlays.

3.   Marketplace Enhancements

•   Develop a secure, user-friendly platform for trading and auctioning NFTs and BMON-based assets.

•   Explore wagering systems for competitive matches.

4.   Community and Influencer Events

•   Organise tournaments, card reveal events, and promotional campaigns to boost user adoption.

•   Partner with influencers in the NFT and gaming sectors for broader outreach.

5.   Continuous Improvement

•   Monitor tokenomics and gameplay data to maintain balance, engagement, and fairness.

•   Gather community feedback and adapt features or release updates accordingly.

9. Disclaimer

This white paper is for informational purposes only and does not constitute financial advice or an offer to sell securities. Cryptocurrency investments carry inherent risks, and participants should conduct their own research or consult professional advisers before investing. Whilst Base Monsters (BMON) strives for transparency and ethical practices, outcomes depend on market conditions, technological factors, and community support. Project developments and timelines may be subject to change.

10. Conclusion

Base Monsters (BMON) has evolved from a simple NFT collectible concept to a comprehensive ecosystem of DeFi, NFTs, and immersive gaming. Through strategic partnerships (most notably with DeHub), innovative gameplay spanning a TCG, an RPG adventure, and Agent Pollak 0x7, alongside transparent operations, we aim to deliver lasting value to collectors, gamers, and investors alike.

Whether you are drawn to the strategic depths of the TCG, the narrative intrigue of the RPG, or the interactive insights of Agent Pollak, there is a place for you in the Base Monsters community. We invite you to join us, shape the project's future, and experience a new era of blockchain gaming on Base Chain.
